

rose plastic

Organising Professionals & Security Experts

PERFECT MATCH

No matter what you need to pack, store neatly or transport safely — we've got the right packaging. Our large product range includes cases in numerous sizes and designs.

Our plastic cases

From the pioneers of protective packaging

Reliable product protection, easy handling, uncompromising quality and durability — this is the standard for all our cases here at rose plastic. The name rose plastic stands for decades of expertise in the development and production of a wide range of plastic packaging options.

With a portfolio of over 4,000 different plastic packaging solutions and cases, we are the worldwide leaders in our field. Throughout our extensive range of packaging tubes, cassettes, boxes, cases and clever transportation and organisation systems, we ensure optimum protection against damage, moisture, dust and oil.

PROTECTIVE PACKAGING PIONEERS

rose plastic is renowned throughout the world as a pioneer in protective tool packaging. Numerous industry firsts and over 65 years of experience have made us the world's best-selling packaging-brand for cutting tools. Many other industries also appreciate our uncompromising quality, precision and reliability.

Hard shell, soft centre.

The **RoseCase** ErgoLine

Our trendsetter

Want to stand out from the competition? Not a problem with RoseCase ErgoLine. With its modern design ensuring maximum recognition value. Loaded with practicality, while at the same time, offering numerous universal applications. We can tailor the case to your specific requirements using colour, corporate design or thermoformed and foam inserts. From now on, you won't have to do without any of your cherished tools, technical equipment or product samples.

EASY TO HOLD

The ergonomic handle is also available with „Soft-Touch“

ATTRACTIVE

Designed with smooth outer shells allowing printing, engraving or labelling

**Everything in
perfect order.**

The **RoseCase**ProTec

Our technician

Technical products belong in technical packaging. Our designers have also thought about this when developing a functional case that is strong and sturdy. The ProTec range of cases can be used for a wide range of products. Bespoke foam inserts are available to hold your tools, drills and electronic devices securely. Using a foam insert really does give the best appearance for your products when delivering to your customer or enhancing the presentation for your sales team!

PROFESSIONAL LOCKING

Sturdy closures ensure easy
opening and closing

CLEAR VISION

Transparent case shells show
what is inside, even before
opening

LOW LOADER

Integral stacking function
saves storage space

Security experts.

The **RoseCase** ProSecure

Our high security area

Peak climbers, deep-sea divers, engineers and technicians in many different industries need their equipment safely stored and organised for work on the go. Securely protecting the equipment in all environments is key. RoseCase ProSecure loves a challenge! Professional protection in extreme situations, is provided by the robust case shells and IP67 seals in the lid. As well as an automatic pressure release valve and double throw latches for easy opening in tough conditions.

Safe.
Waterproof.
Shockproof.
Dustproof.

MAXIMUM SECURITY

Padlock eyelets for added security

ULTIMATE SEAL

IP67 certification preventing dust and water ingress

PROTECTIVE PATTERN

Configure and customise foam inserts

Space saver.

The **RoseCase** RCB and RCS

Our space miracles

RoseCase RCB and RCS are our selection to cover products that need something a little bit different. Both make prime use of their size – a space miracle. A foam insert can be added to maximise on protection and presentation without compromising on space. If you need something for a special product speak to us!

SPACE EFFICIENT

The foldable handle helps to utilise storage space

WITH DEPTH

The RCB is also suitable for large contents due to its particularly deep case shells

TWICE AS SAFE

The double-walled case shells provide extra protection

Designer display case.

The **RoseCassette**

Our eye-catcher

Bringing organisation to smaller parts, this highly transparent plastic lid offers the best view on inner values. As an organisation box, it is ideal for storing and transporting screw or drill sets, fixings, dowels and other small component parts. With matching thermoformed inserts as well as various colour combinations, printing and labelling options, the cassette can be individually designed. What more do you need?

Universal,
light and
stable

CLEAR AS GLASS

The highly transparent lid provides the perfect view

PRECISE ORGANISATION

Everything stays in its place: screws, dowels, washers, nuts and more

PERFECT FIT

With deep-drawing inserts the cassette can be adapted to your needs

Our foam solutions

Where ideas become reality in foam

So the decision has been made, you have chosen your perfect packaging solution. Now for the icing on the cake, the foam insert... For that added protection we are able to offer a comprehensive range of protective foam inserts. From the inexpensive standard stock versions to the custom-made bespoke solution, created with millimetre precision and finesse. Available in a choice of PE rigid & PUR grades of materials and colours. If that is not enough, we are happy to fulfil any special requests.

Practical,
secure and
efficient

MULTIPLE SHAPES

Foams are available in all conceivable shapes, including round

**EVERYTHING IS
CONSIDERED**

We offer solutions for almost all our products, with many available from stock

Foam inserts that fit like a tailor-made suit

What exactly is a foam insert? Which material and design possibilities are there? Find out more information here.

Custom foam work that you can afford!

IN 7 EASY STEPS TO YOUR FOAM SOLUTION:

- 1. Enquire
- 2. Quote
- 3. Measure
- 4. Design
- 5. Approve
- 6. Manufacture
- 7. Deliver

Material

DOUBLE PROTECTION

Double is known to be better. That's exactly how we see it: foam inserts ensure that your products sit securely in our packaging and offer the maximum protection to sensitive content. They are particularly suitable for the protection of complex monitoring equipment and component protection within Aerospace, Offshore, Defence, and Energy renewables, Audio / Visual, Medical & Marketing sectors that require products to be transported together in one secure case.

PE FOAMS

Polyethylene (PE) foam is an extraordinarily versatile, fully extruded, durable material that gives a unique combination of excellent physical and chemical properties with a smart appearance. The light-weight closed-cell construction offers superior cushioning against repeated impacts and can be engineered with anticipated performance. It provides easy fabrication, cost-effectiveness and suitability for a wide range of applications. PE foams are commonly used for standard packaging, cushioning, blocking and bracing, or surface protection.

PUR FOAMS

In contrast to PE foams, Polyurethane (PUR) foam is a light, inexpensive and durable foam with many applications. Convoluted (egg crate) foam, gasketing, filters, sponges and sound dampening (acoustical foam) are all examples of Polyurethane foam. Polyurethane foams are clean, non-abrasive, extra strong, and durable and perfect for general comfort cushioning, display and packaging of products.

Colours

PERFECT APPEARANCE

As we all know 'First impressions count'. In order to leave a positive lasting impression, you should think about the colour of your foam. To help you do this, we have a large selection of choice from a comprehensive colour palette to compliment your corporate design.

Production

CAD/CAM DESIGN

A dedicated design team with decades of experience – a winning combination. We can support you proficiently and personally in the development and implementation of your required foam solution. For this we use the latest range of advanced AUTOCAD and CNC software packages, so you can rely on our service from the first contact to the conception and implementation of your project.

MANUFACTURING

CNC multi-head/axis machining, die-stamp & water jet cutting: Complex shapes, varying depths, recessed grips, and assorted sizes – no problem. Using the latest technology, allows us to offer a truly professional and custom solution to suit your specifications with millimetre precision.

LASER MARKING

Save the best while last: By using the latest in laser branding techniques, we are able to make sure your projects remain 'on brand' at all times. Precise lasers allow for both intricate fonts along with complex logo designs giving your product the winning factor.

GET IN TOUCH

If you have a specific idea or design in mind, we are on hand to answer any queries you may have. Alternatively, if you are ready to start the process, get in touch with us for a free consultation.

Finest selection.

Bio-PE

Our printing and finishing service

Because last impressions count

So it's time to stand out from the crowd. Let us help you to impress your clients. Packaging is a key part of your product and therefore an integral component of your brand. A smart imprint significantly enhances. In other words: Effective branding begins with the packaging rather than the product. Our in-house print shop enables us to print your packaging immediately after production, avoiding costly detours. Full colour label options can be provided to perfectly align with your corporate design strategy and help you stand out from the crowd.

POSSIBLE HINTS FOR YOUR LASTING IMPRESSION:

- Company logo or product brands
- Slogans or other short texts
- Product information
- Company information
- Drawings, illustrations, symbols
- Picture motives

**I am 100%
recycled.**

Sustainability

Several paths – one goal

When it comes to sustainability, we at rose plastic go in several directions at once. Whether through clever product design or efficient processes – all these steps help us to use energy and raw materials carefully. In all our projects, we set ourselves long-term goals and forego short-term successes.

Thinking in cycles

rose plastic is taking another approach with the use of post-consumer recyclate (PCR). The recyclate consists of plastic waste from private households. Properly processed, the plastic waste is converted into new valuable resources. These in turn are then used to produce our packaging. Incidentally, our products made from PCR are just as good as those made from virgin materials.

Would you like to learn more about our projects? Do you want to know how we at rose plastic live the environmental idea? Then we recommend our sustainability brochure to you. Here you will find all the facts clearly and compactly summarized.

We breathe new
life into recycled
plastic.

Wherever you are, we are close by

At home all over the world

With around 800 employees at 10 locations around the world, we are also near to our customers.

For short distances, reliable logistics, and sustainable business practices, we supply companies all over the world from our locations in Europe, Asia, North America and South America.

Thanks to our production capacity and efficient logistics, we can naturally supply our customers quickly and reliably with smaller quantities. However, we can also process large-volume orders on time with high process and product quality.

OUR FULL PRODUCT RANGE

An overview of our entire product range with around 4,000 different packaging solutions can be found on our website at www.rose-plastic.co.uk
