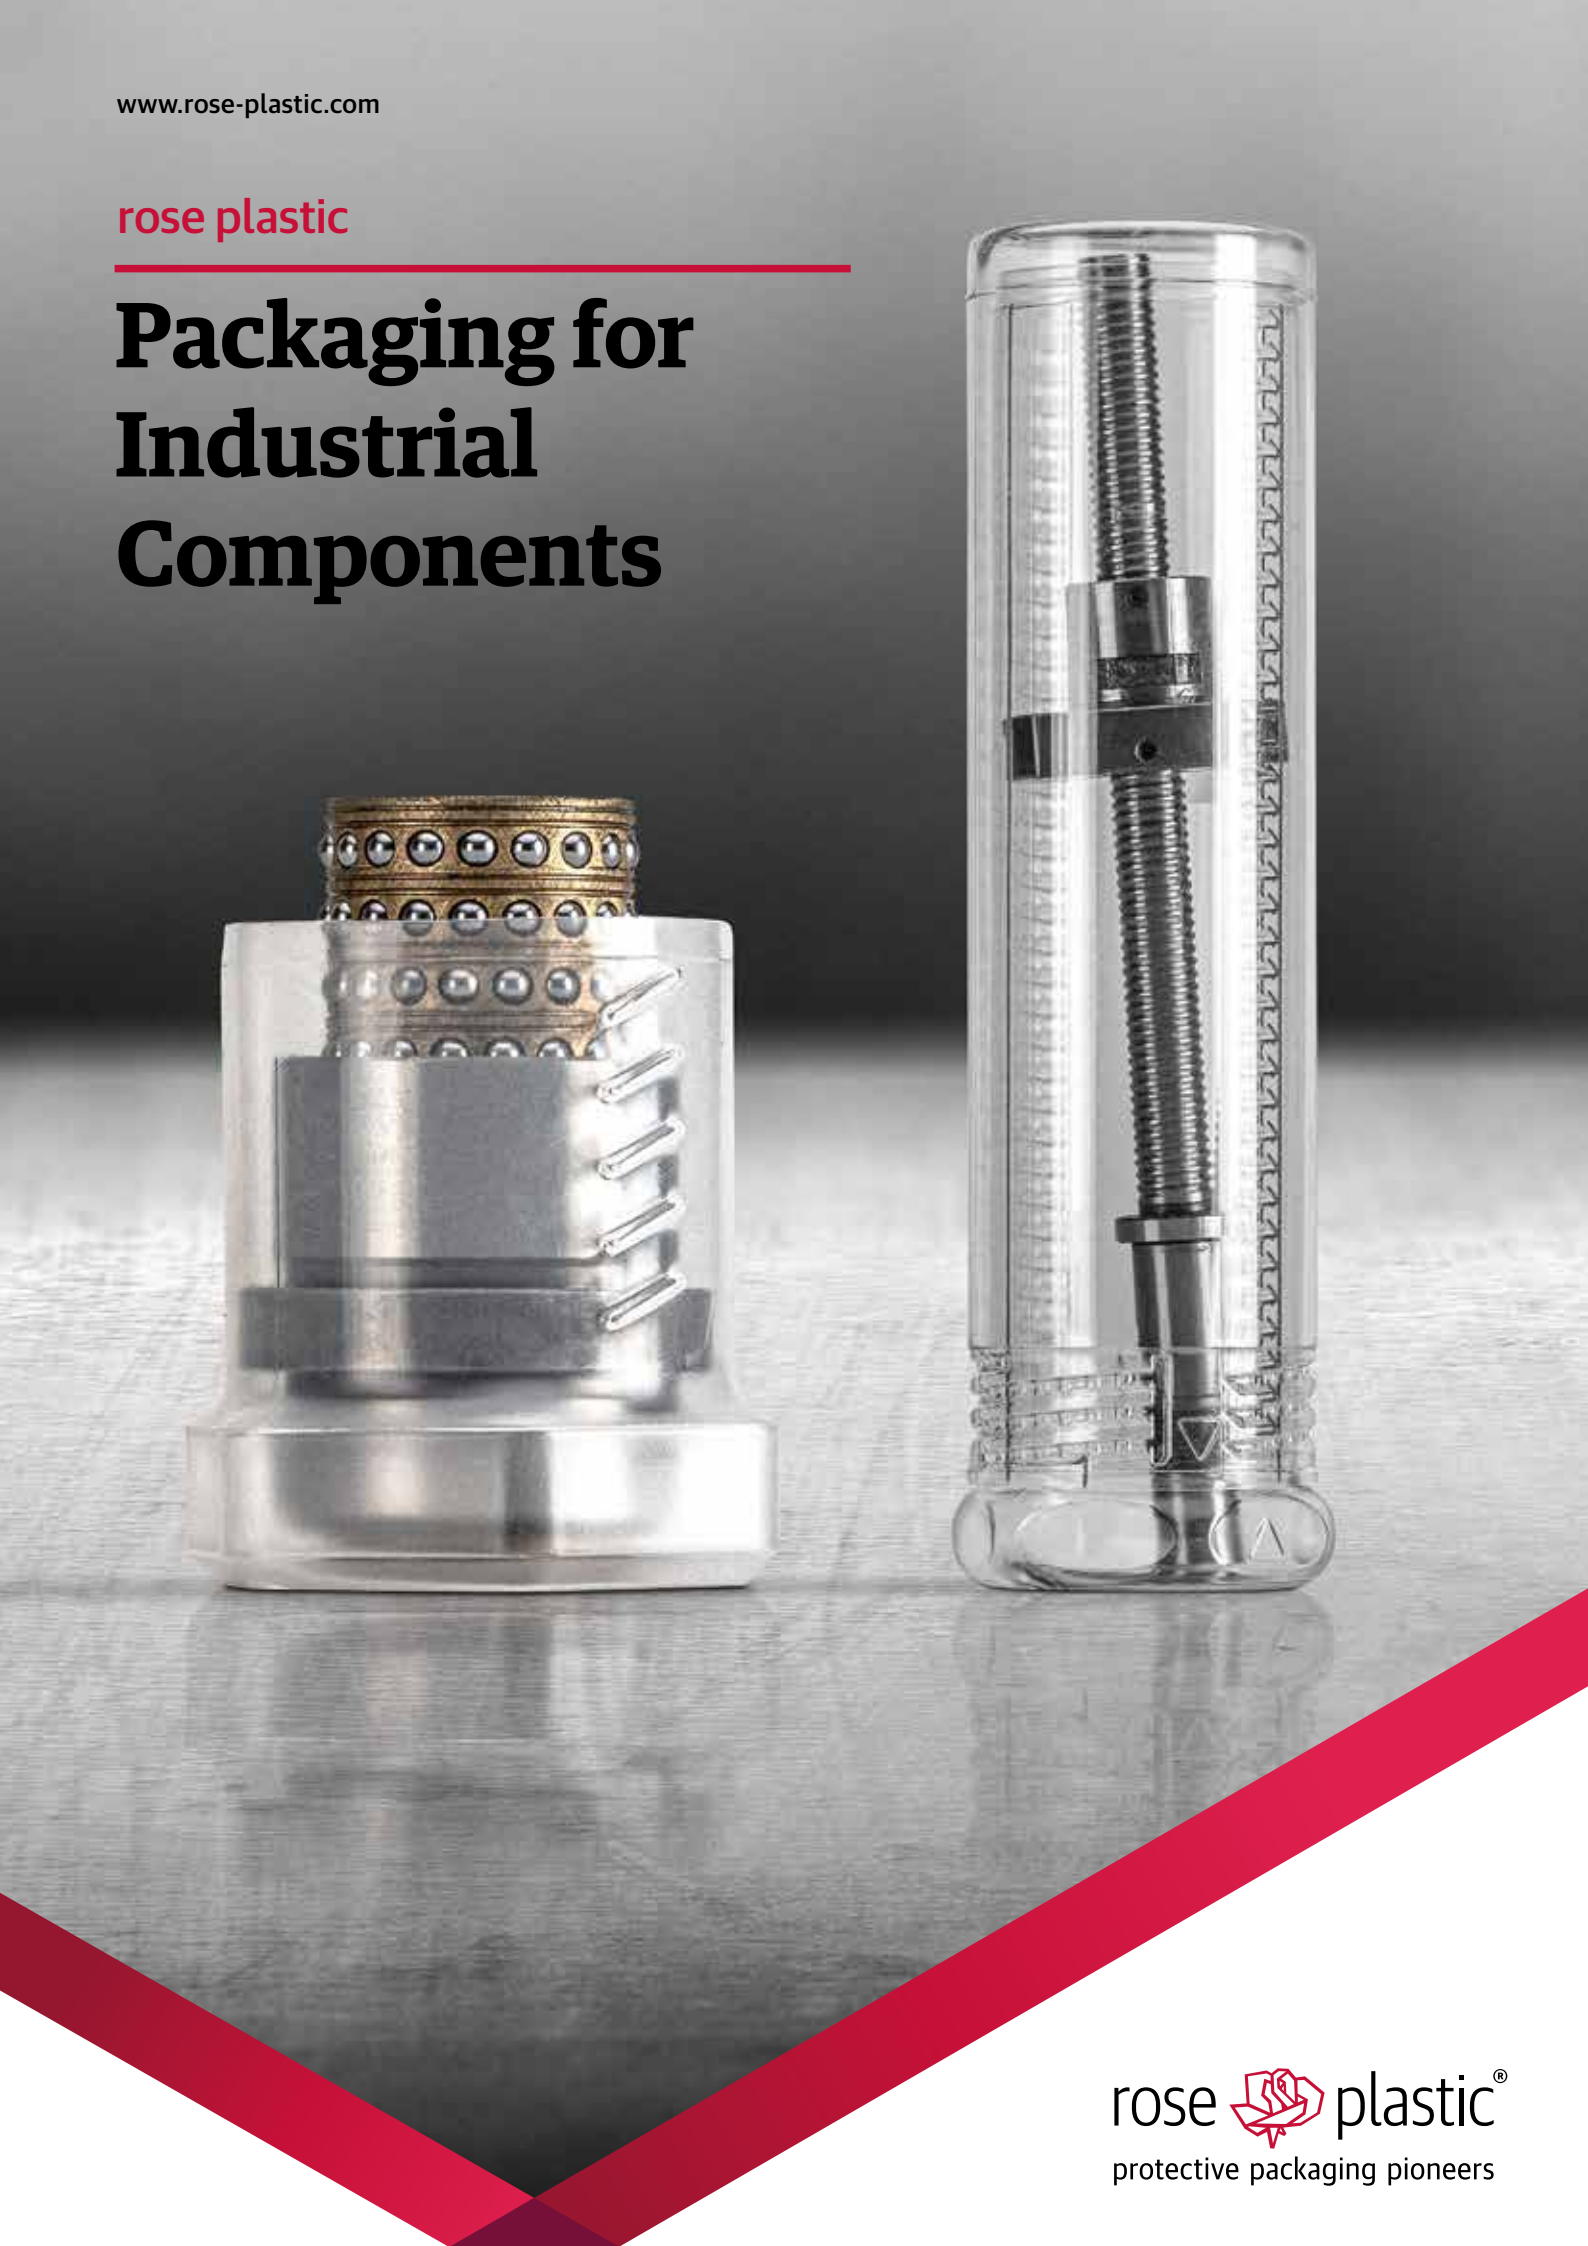
Packaging for Industrial Components



rose plastic®
protective packaging pioneers

rose plastic®

THE PERFECT PACKAGING FOR INDUSTRIAL PRODUCTS

No matter whether you want to pack sensitive electronic components, valves or complex measuring instruments – at rose plastic you're guaranteed to find the ideal protective and logistical packaging solutions for every product.

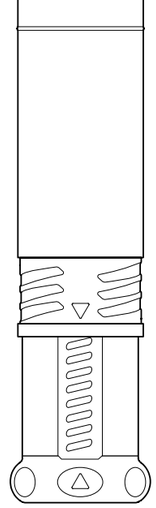
Tubes | Boxes | Cases | Cassettes | Transport & Storage Systems

Industrial Components, perfectly packaged

From the pioneers of protective packaging

High quality technical components and plastic packaging from rose plastic – a winning combination. Our packaging solutions don't just protect your products during transport and storage – they also stand out, thanks to easy handling and innovative designs.

With a portfolio of over 4,000 different plastic packaging solutions, we've been the world's number one provider of packaging for high-quality cutting tools, industrial components and spare parts for decades. Our packaging tubes, boxes and cases ensure optimum product protection against damage, moisture, dust and oil.



PROTECTIVE PACKAGING PIONEERS

rose plastic is renowned throughout the world as a pioneer in protective packaging. Numerous industry firsts and over 65 years of experience have made us the world's best-selling packaging brand for cutting tools. But also manufacturers of industrial components and other industries appreciate our uncompromising quality, precision and reliability.

Service, protection and special requests

12 convincing reasons to choose rose plastic

There are many good reasons why manufacturers of industrial components around the globe choose our plastic packaging solutions.
Here is why:

1

NO COMPROMISES WHEN IT COMES TO QUALITY
High-quality technical products need perfect protection. That's why all our protective packaging is designed to ensure the highest possible stability and strength, rather than the lowest price. We know that inadequate product protection will ultimately prove to be the most expensive solution for you.

2

DECADES OF EXPERIENCE AS PIONEERS IN PROTECTIVE PACKAGING
We've been in business for over 65 years. Today, we're regarded as proven specialists in the development and manufacturing of plastic packaging. Our packaging solutions have repeatedly set new standards in terms of quality, design and functionality.

3

LOCATIONS ALL OVER THE WORLD
With locations all around the globe, we are always close at hand. Which means you can obtain identical plastic packaging anywhere in the world with consistent high quality.

4

FULL-SPECTRUM SERVICE
We provide everything you need from a single source: personalized advice, innovative development, design and construction of precision tools, high-quality finishing via printing or engraving, packaging and reliable shipping to almost every country on Earth, and much more besides.

5

MAXIMUM PROTECTION FOR YOUR INDUSTRIAL PRODUCTS
Our robust packaging absorbs shocks and effectively protects the contents against moisture, dust and oil, thereby ensuring your technical products reach your customers in perfect condition.

6

PROTECT. PRESENT. PROMOTE.
The right packaging not only protects your products, but also puts them in the spotlight. Our attractive packaging solutions let you highlight the value of your products – and differentiate them from the competition.

7

EASY HANDLING THANKS TO EXCEPTIONAL ERGONOMICS
We put a lot of time, thought and energy into our packaging. But we hope you won't notice this. Seriously, we want the exemplary ergonomics of our packaging to make handling it anything but a memorable experience – quite simply effortless.

8

VAST RANGE OF PACKAGING SOLUTIONS
More than 4,000 different types of packaging in assorted materials, colors, dimensions and lengths can be found on our website, as well as assorted inserts, adapters and accessories.

9

CUSTOMIZED PACKAGING SOLUTIONS
Despite our huge product range, what if none of our packaging solutions quite fits? If required, we'll simply work with you to develop a customized packaging solution for your product. Our designers, engineers and project managers will ensure that the result is a well-conceived and an affordable solution.

10

PERSONALIZED ADVICE FROM EXPERIENCED PACKAGING SPECIALISTS
We want you to be completely satisfied. That's why our customer service staff will go to great lengths to provide you with competent and personalized advice. Together, we'll find the optimal packaging solution for your technical products.

11

FINISHING VIA PRINT OR ENGRAVING
At our in-house print shop we can add high-impact promotional prints to your plastic packaging, such as your company logo, slogan or important product information. Alternatively, we also offer laser engraving to keep your product on brand.

12

FOR US, SPECIAL REQUESTS ARE STANDARD PRACTICE
Each technical product is different. Which is why we also cater for special requirements, for example via our VCI protective packaging with integrated corrosion protection, or with our ESD packaging that prevents electronic components from being damaged by electrostatic discharges.

Our packaging for laser nozzles

Fusion at its finest

'Fusion' the process or result of joining two or more things together to form a single entity. Laser nozzles are an essential component that demands high quality results and, in turn, require high quality packaging.

Our range of practical packaging options are available for both single and multiple pieces. So, if you are looking to pack multiple nozzles, our FivePack is the perfect solution. With its multi-chamber design, consisting of five detachable units, it allows you the freedom to decide on the package quantity. If you prefer, UniBox and TwistPack are the perfect solution for individual pieces and available in a large range of sizes. Whatever your preference we can fuse your product to the right packaging.

Extra efficiency. **Extra safety.**

Square.
Practical.
Secure.

Our packaging for E-components

For all-round protection

The production of electronic components is complex and expensive, making it all the more important that sensitive components reach the customer undamaged. This means that the packaging must fit perfectly, like a tailor-made-suit.

But what if an unwanted electrostatic discharge occurs? Even low voltages are enough to partially destroy electronic components. With our special ESD protective packaging, made of conductive material, you can prevent charges and rapid discharging processes.
This protects your electronic components.

Our packaging for measuring and control devices

When inner value requires high value protection

Absolute accuracy is expected from measuring and control devices. So it is essential that your products are fully protected from damage during the production and transportation process. Utilising our engineered shock, impact and dirt resistant packaging will allow all components to remain intact and protected, thus reducing damage.

So, from now on, levelling instruments, test gauges, thermometers and hydrometers are fully protected in their packaging until their next use. Looking to pack and protect mechanical, electronic instruments, regulators, control systems and IT equipment? We have the prefect packaging solution.

Our packaging for bearings

No more chaotic warehousing

The user demands maximum functionality and load capacity from high quality mechanical components, such as rollers, needles, gears, shafts and bearings. All are susceptible to external influences such as impacts, moisture, contamination and corrosion, resulting in reduced service life, damages and waste. Preventing such damages is essential. So, with over 4,000 protective packaging products, rose plastic has the solution.

Our designers have worked hard in creating a package that is perfect for the transportation and long term storage of sensitive products, while been sustainable and reusable offering benefits to the environment and your wallet.

NEED A RIDE?

Customer specific logistical storage solution

SET-PACKAGING

Ideally suited to accommodate multiple bearings

ABOVE STANDARD

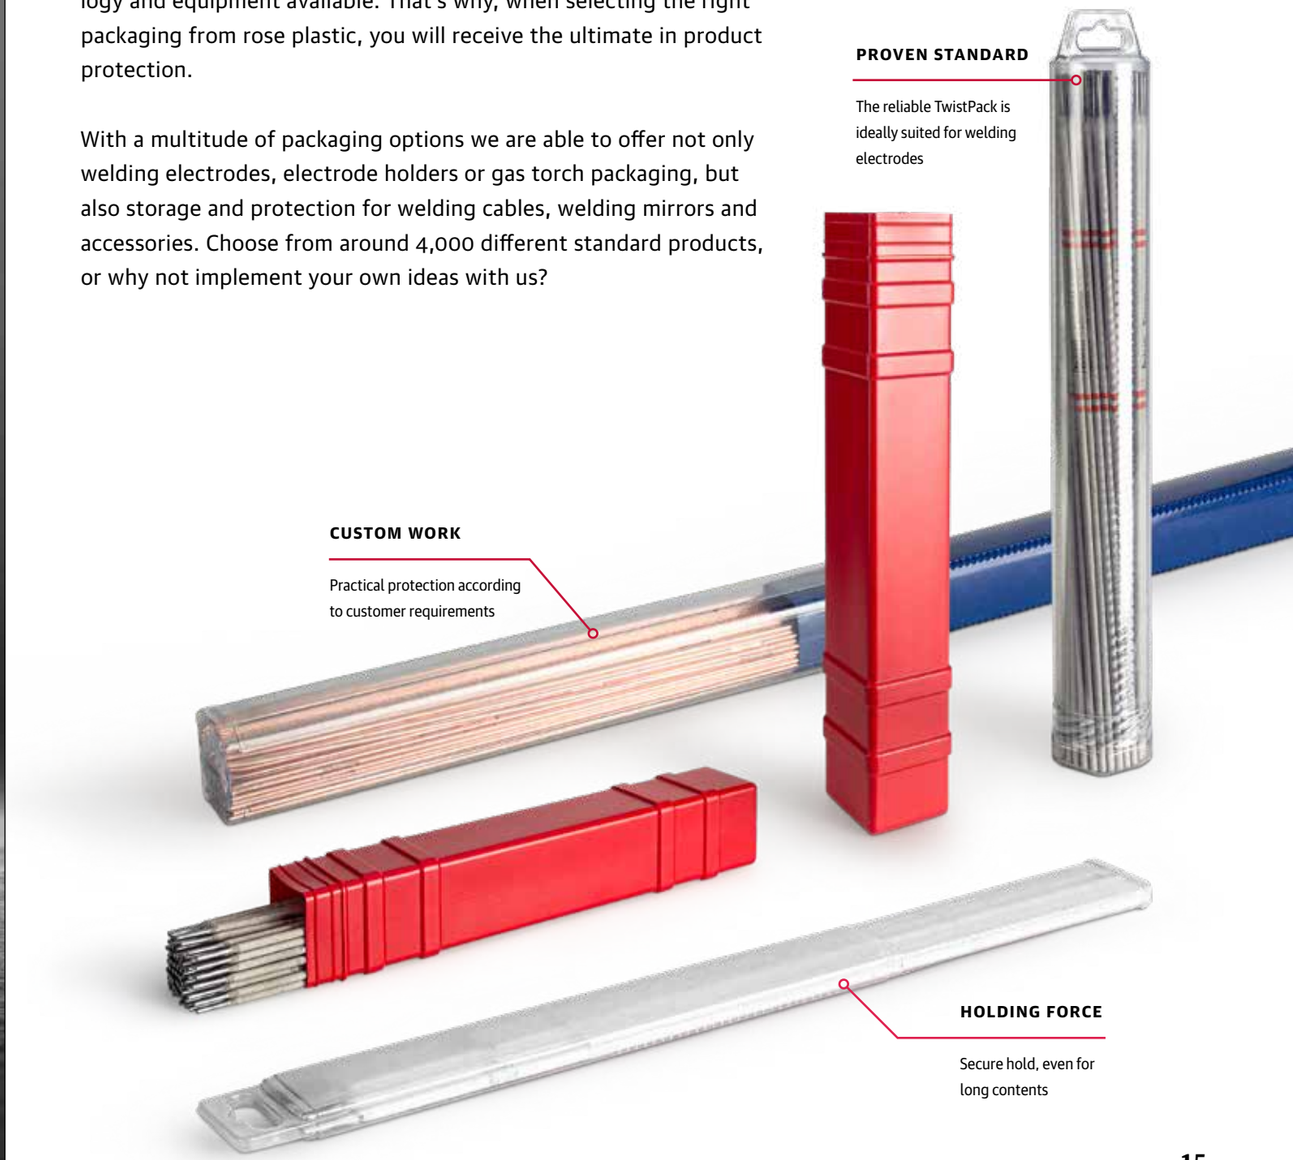
Let's develop your own packaging solution together

Our packaging for welding accessories

Ultimate protection

In search of the perfect weld? It is essential to use the best technology and equipment available. That's why, when selecting the right packaging from rose plastic, you will receive the ultimate in product protection.

With a multitude of packaging options we are able to offer not only welding electrodes, electrode holders or gas torch packaging, but also storage and protection for welding cables, welding mirrors and accessories. Choose from around 4,000 different standard products, or why not implement your own ideas with us?



Our packaging for spindles

To create order from chaos

Everywhere you look, there are cardboard cartons, wooden crates, bubble wrap and packaging chips. As we all know, space has always been in short supply within the logistics department. That is why at rose plastic we can bring order to your chaos with the added bonus of reducing your assembly labour cost, eliminating damages and improving efficiency.

Our boxes and tubes are ideally suited for the safe transportation and shipping throughout the many stages of the manufacturing process. If you are looking for the perfect solution when it comes to the protection of spindles, gears and components, then look no further than our comprehensive range of sealable, reusable and recyclable protective packaging.

WITH A VIEW

For clarity, our packaging is also available in trans-parent

SUSTAINABLE

Not for single use: all our packaging is reusable

WAREHOUSE PROFESSIONAL

When designing our packaging, we always pay attention to optimal shelf life

Our packaging for valves

From steering systems to ship's engines

There is barely a technical product for which we do not offer an appropriate packaging solution. From delicate valves for camshaft controls to value plugs weighing several kilo's for ship engines, rose plastic has a solution.

But from time to time that little something extra special is required. So, when that time arrives, why not let us develop a tailor-made packaging innovation together?

SECRET OF SUCCESS

Stand out from the competition: With our innovative packaging solutions

PLUGPACK

Secure plug closure with anti-roll protection

HOW ABOUT COLOR?

Choose from 21 standard colors or send us your desired color

Our packaging for gears

For shiny, gleaming teeth

So you have made your gears and now you need to give them the protection they deserve. During the numerous stages of production, transportation internal and external for heat treatment and coating, damage to sensitive teeth need to be avoided at all cost. No matter whether you are dealing with gears, spur, elliptical, bevel, crown or worm gears, rose plastic has the perfect protective packaging solution.

Looking to remove the process of greasing, oiling or waxing? Look no further, as our packaging can be equipped with an active substance against corrosion. In the closed position the protective additive forms a defensive layer around the gears, which provides years of protection against rust and corrosion.

VCI-PACKAGING

If required, our packaging also protects against corrosion

BLOCK PACK

Impresses with innovative TwistLock closure technology

STORAGE ADVANTAGE

UniBox reduces space with its stackable design

Wherever you are, we are close by

At home all over the world

With around 800 employees at 10 locations around the world, we are also near to our customers.
For short distances, reliable logistics, and sustainable business practices. We supply companies all over the world from our locations in Europe, Asia, North America and South America.

Thanks to our production capacity and efficient logistics, we can naturally supply our customers quickly and reliably with smaller quantities. However, we can also process large-volume orders on time with high process and product quality.

OUR FULL PRODUCT RANGE

An overview of our entire product range with around 4,000 different packaging solutions can be found on our website at www.rose-plastic.com
